

The Opus College of Engineering works with a local vendor, Paragon Development Systems (PDS), to provide students better prices on laptops required to run advanced engineering software they will need in the course of their studies. As such, all laptops include a 4-year, next business day warranty to ensure any hardware issues will be resolved in a timely manner with minimal impact to students. To simplify the purchasing process, only a few mobile workstations (laptops) are offered by PDS. If the mobile workstations offered by PDS do not suit your needs, or if you prefer another manufacturer, please use the listed hardware specifications as a guide when purchasing.

Please keep in mind that engineering software is designed and optimized to run on ISV-certified graphics, consumer-grade hardware will not work in most cases. Make sure your laptop has an NVIDIA Quadro or AMD FirePro/Radeon Pro graphics card installed.

Additional mobile workstation manufactures and models:
